## Ice Breaking News

On Monday February 26, 2007 Dan Rohe, President of EPI and Brad DeArment, EPI Sales Manager participated in a once in

lifetime excursion: They had the opportunity to be aboard the US Coast Guard Cutter Biscayne

Bay on an ice breaking mission through Lake Michigan's Straights of Mackinaw.

Gary Perkins is a Veterans Employment Specialist with the Bureau of Workforce Programs, Michigan

Department of Labor and Economic Growth. He works out of the Traverse City Michigan Works office and as a volunteer he is also the Northern Region Chairperson for Employer Support to the Guard and Reserve (ESGR).

ESGR is developing partnerships with employers and civic and business leaders from all over Michigan. It is their desire to explain the mission of our reserve forces and enhance the support network for members of the guard and reserve when they return from military training or deployments.

Gary has assisted EPI in locating and hiring qualified military veterans. EPI installation superintendent Joe Baker is one of those trained and experienced military vets. Joe is organized and construction oriented. He is a member of the local search & rescue team and a volunteer fireman in his free time.

EPI is pleased to participate with ESGR in their programs and we look forward to future connections.
